Recent Evidence of State-Sponsored Terrorism for the DCI's
Speech

Libya is suspected of involvement in several attacks since the Berlin nightclub bombing. European allies have moved to expel Libya's diplomatic representatives as their involvement in terrorism has been revealed.

All in all
~~Nearly 50 Libyan diplomats have been expelled from Spain, Italy, France and West Germany, and Libyan-sponsored terrorists have been expelled from France and Turkey. In at least France and Turkey, these Libyan-sponsored anti-US plots were designed to cause the maximum amount of civilian casualties.~~

--Libya has been actively plotting attacks against US targets in Khartoum, where we believe Libya was behind the shooting of a US Embassy diplomat one day after the US airstrikes on Libya. Ten days later, another US diplomat was seriously wounded in an assassination attempt in Sana, North Yemen.

--The British government has said it has reliable informations that the two British teachers wre kidnaped on behalf of the Libya government, and that Tripoli was responsible for their execution. Three bodies--the two teachers and American Peter Kilburn, a hostage in Lebanon since December 1984--were found together with a note claiming they were executed in retaliation for the US raid on Libya. Libyan involvement in the death of Peter Kilburn, therefore, is almost certain.

Syria also backs radical Palestinians, and the attempted bombing of an El Al plane in London may have been done with Syrian support.

Syria also apparently assisted three Palestinians in a bombing in West Berlin in late March, according to their confessions in the West German press.

The fourth Palestinian in London who helped them is under arrest for the attempted bombing of the El Al plane at Heathrow Airport. He has travelled to Syria, and showed British police safehouses where Syrian diplomats stashed him immediately after the attempted bombing.
